

# Risk Design Analytic Drawing

AUTHORS  
Jonathan Massey  
Andrew Weigand

As a complement to Risk Design, an analytic drawing of 30 St. Mary Axe. Click the drawing to see it at full resolution.

**CROSS VENTILATION**

**EXPOSURE**

The developer was able to purchase the rights to the site that had been partially reserved for the State of Michigan. By leveraging the developer's track record, the developer was able to secure the necessary permits and insurance against terrorism risk. The exposure was then split between a new insurance carrier.

...the building's facade... the roof is... the building's facade... the roof is... the building's facade... the roof is...

**TERRORISM**

**RISK DESIGN**

By... the building's facade... the roof is... the building's facade... the roof is... the building's facade... the roof is...

**RESILIENCE**

The... the building's facade... the roof is... the building's facade... the roof is... the building's facade... the roof is...

**A RING OF STEEL**

Like... the building's facade... the roof is... the building's facade... the roof is... the building's facade... the roof is...

**A CLUSTER OF TOWERS**
